Buying off Plan

www.buyingoffplan.com

About Buying off Plan

Buying off Plan provides real estate support services that range from securing the best location, design personalization, and managing building projects to ensuring maximum return on investment.

Project Requirement

The client wanted an appealing Flash website with a dynamic layout and an accurate search facility. It was to display images of villas, houses etc. along with the flexibility to generate run-time PDF on click of a link/image to download information.

The Challenge

Flash: High use of Flash work on home page to create a grand look.

ActionScript Coding: Use of ActionScript coding that required expert programming effort.

Run-time PDF Generation: The client wanted run-time PDF generation containing information about property listing when a link/image was clicked.

Advanced CMS Integration: The client wanted to be able to regularly update the content, which required CMS integration.

Our Solution

Our professionals created for the client a dynamic Flash website with graphic animations and an excellent search feature. The site has the capability to generate run-time PDF on click of a link/image.

Key Features

- Rich and attractive layout
- Run-time PDF generation on click of an image/link
- Database-driven dynamic website
- Admin panel for content update
- Appealing Flash work
- Effective graphics to support content
- Flash banners at appropriate places
