### About Crest Club Apartments

Located near the banks of the Chattahoochee River - the state border between Alabama and Georgia, Crest Club Apartments are surrounded by lakes, parks, businesses and homes. Neighborhood shopping, dining and recreation are all just a short walk away from Crest Club Apartments, making "Crest Club experience" truly unique to call home.

### Project Requirement

The company required a well designed website through which they could showcase their accommodation, facilities and location. The site had to be a database driven dynamic website where the client could effortlessly make changes.

### The Challenge

**Banner Management:** The client wanted the use of different banners on different pages of the website.

**Advanced CMS Integration:** The client wanted to regularly update content, which required CMS integration.

**Database-driven Website:** The client wanted a database driven website to manage web content including images through a user friendly CMS.

### Our Solution

RiaEnjolie designed an attractive and appealing website using dynamic Flash header on the home page. Our professionals also designed a logo for the company and integrated the site with a user friendly CMS that enabled the client to make content changes with ease.

### Key Features

- Database driven dynamic website
- Admin panel for routine website changes
- Use of appealing graphics
- Banner management
- Floor plan gallery
- Logo design
