USA Services of Florida

www.usaservicesfl.com

About USA Services of Florida

The client provides cleaning services such as power sweeping, roadside mowing, and waste services.

Project Requirement

The basic requirement of the client was to have an appealing website design which is database-driven. The client also required an advanced CMS and a feature to manage Header Flash Image from admin panel for each page.

The Challenge

Advanced CMS Integration: The client wanted to be able to update product listings on the website. This required CMS integration through Admin Panel.

Database-driven Website: The client wanted to fetch data from a database and update the database when required through the website.

Our Solution

Our experts designed for the client an exceptional dynamic database-driven website with an Admin Panel for updating content and pictures as and when required. The overall feel of the website has been best illustrated by the use of appropriate color and images at the right places.

Key Features

- Database-driven dynamic website
- Admin panel for making routine changes to the website
